

**The name that brought the world
its first microfilm scanner has
just created its most advanced
scanning software**

Quantum

Mekel Technology's next generation of roll-film scanning and processing software technology

ROLL FILM. RIBBON SCAN. STRIP SCAN. COMPLETE CAPTURE.

No matter what the technology is called, when it comes to full-roll ribbon scanning, Mekel Technology's **Quantum** software scanning and processing technologies offer superior image capture, quality, processing and savings benefits.

✓ **Increase operator production**

- Scan at full-rated speeds without operator intervention
- Share quality assurance tasks with multiple operators
- Drive multiple MACH V microfilm scanners with a single operator

✓ **Reduce microform scanning costs**

- Never search for lost images
- Eliminate the need to rescan

✓ **100% image capture guaranteed**

✓ **Optimum image quality**
