A New Generation of Document Scanner

Enhanced with innovative features, the Avison AD250F offers high throughput of 80 ppm and 160 ipm in a compact footprint conserving both space and budget. Unlike common sheet-fed scanners which provide only the auto document feeder and can not accommodate irregular sizes and weights of paper, the AD250F harmoniously combines the benefits of the fast scan rate of the ADF and the convenience of the flatbed unit to meet customer's diverse requirements.

Support form document up to 242 x 356 mm (9.5 x 14 in.)

The AD250F boasts a unique and innovative design in comparison with its predecessors - the ability to accommodate form document up to 242 x 356 mm (9.5 x 14 in.). The extended document width from standard 216 mm (8.5 in.) to 242 mm (9.5 in.) makes the AD250F more competitive to fit for a wider range of documents.

Advanced Friction Roller and Paperweight Enhances Paper Separation and Feeding Reliability

Designed with the innovative reverse roller and paperweight for advanced paper separation, the AD250F delivers outstanding feeding reliability by effectively reducing the risk of a multi-feed or paper jam for a wider variety of scanning situations.

A Duplex Scanner Suited for Document and Cards

Thanks to the advanced straight paper path and image processing technology, mixed batches of documents with various sizes and weights can be scanned, appropriately cropped, deskewed, and ready to use. Scan size accepts paper from receipts 50 x 50 mm (2" x 2") to business document 242 x 356 mm (9.5" x 14"). The auto document feeder is also robust enough to feed paper up to 400 g/m² (110 lb.) and embossed hard cards such as ID cards, credit cards, driver's license, and health insurance card up to 1.25 mm in thickness.

Earth-Friendly LED Technology

The AD250F delivers high throughput and outstanding performance. However, it is earth-friendly at the same time. The LED technology requires no warm up time and is lower power consumption without generating mercury vapor as other traditional scanners using the CCFL (cold cathode fluorescent lamp) technology.

High-Volume Daily Duty Cycle

The scanner can be used to scan up to 10,000 pages per day through the 100-page automatic document feeder. The data indicates that this scanner is designed to scan document in any application requiring frequent document and hard card scanning.

What we have bundled

The Avison AD250F scanner comes with TWAIN and ISIS drivers and are also bundled with full version of exclusive Avison AVScan X, Button Manager V2 and Nuance PaperPort SE 14 software application.

Avision's Button Manager V2

-Completes your scan with a single step

The Button Manager V2 main screen

AVScan X

-The Intelligent Document Management Tool

The AVScan X main screen

Button Manager V2 makes it easy for you to scan and send your image to your favorite destinations with a press one button. Now the new version comes with an innovative feature to let you scan and automatically upload the scanned document to popular cloud repositories such as Google Docs, Microsoft SharePoint, or FTP. In addition, the iScan feature allows you to insert the scanned image or recognized text after optional OCR (Optical Character Recognition) process to your text editor such as Microsoft Word to get your job done easily and quickly.

Document Imaging is the very first step of Document Management. However, poor quality images can cause serious problems to later indexing or storing processes. It may increase scanning labour costs and lowers the OCR accuracy. AVScan X ensures all documents are checked and polished at the time they are scanned such that the image quality is guaranteed before they are ready to use for other purposes.

AVScan X is an intelligent scanning and electronic filing solution. AVScan X possesses distinct features that convert and index scanned information into electronic documents for easy storage and fast retrieval.

MiBox Scan APP

MiBox APP main screen

By connecting the scanner to Avison's newly designed MiBox, the scanner can be upgraded into a wired or wireless scanner to let other computers or smartphones/tablets to scan and receive image data directly from the scanner in the LAN.

MiBox Application

To let your mobile devices instruct to scan and receive the scanned image, you need to install the mobile app – MiBox to your smart phones or tablets. The MiBox application can be purchased for free from an application store such as Google Play.

Simply press the [Start scan] button, the scanner begins scanning the document and the thumbnail image will be displayed.
